

The simple yet eye-catching APOLLO aims to make a big impression in any space. The oversize shade embraces and reflects light at the same time, preventing the light from being visible and causing glare. Available in two sizes, the mega floor version comes with wooden tripods (in two colors), while the standard version comes with steel tripod in black. Both versions come equip with touch-dimmer controls (located behind the shade), allowing users to enjoy flexible modes similar to the idiosyncrasies found in natural light.
