

Land

Riappropriarsi della terra, sentirsi accolti in volumi che danno protezione, questa è stata l'ispirazione che ha guidato il restyling di Limes.

La cifra stilistica si coglie nella base imbottita che poggia sulla cornice in metallo e si evolve nel disegno dei pannelli schienale, ora intrecciati con spiccate senso sartoriale. Limes Land conserva la sua natura nomade grazie alla flessibilità offerta dal sistema di aggancio dei pannelli schienale, permettendo di cambiare agevolmente la posizione di seduta.

La sua spicata personalità lo rende protagonista sia quando è elemento singolo, sia quando è sistema modulare. I singoli pannelli schienale si possono riorganizzare in modo intuitivo, per rispondere agevolmente alle esigenze del momento, reinventando la geografia dello spazio in modo personale e creativo. A completare il progetto, i piani removibili sono utili appoggi in prossimità della seduta, inseribili su tutti e quattro i lati.

Reclaiming the floor and feeling welcomed in volumes that offer a sense of protection was the inspiration that guided the restyling of Limes. The stylistic code can be noted in the padded base that rests on a metal frame and evolves in the design of the back panels, now intertwined with a strong sartorial touch. Limes Land retains its nomadic nature thanks to the flexibility offered by the backrest panel attachment system, which allows an easily changeable seating position. Its strong personality makes it a protagonist both as a single element as well as a modular system. The individual back panels can be intuitively rearranged to easily adapt to the needs of the moment, reinventing the geography of the space in a personal and creative way. To complete the project, the removable side surfaces are useful supports near the seat, which can be inserted on all four sides.
